

## جداول

جدول شماره ۱: دسته بندی نتایج کمیته مرگ و میر بر اساس مکان و نوع خطا

| Types of Error<br>Location | Missed<br>Diagnosis | Delay<br>Diagnosis | Error In<br>Treatment | Error In<br>Equipment | System<br>Inadequacy(Staff) |
|----------------------------|---------------------|--------------------|-----------------------|-----------------------|-----------------------------|
| Pre Hospital(EMS)          |                     |                    |                       |                       |                             |
| Emergency Room             |                     |                    |                       |                       |                             |
| Operation Room             |                     |                    |                       |                       |                             |
| Recovery                   |                     |                    |                       |                       |                             |
| Ward/Observation Unit      |                     |                    |                       |                       |                             |
| ICU                        |                     |                    |                       |                       |                             |

شماره 2:

### Categorization of Mortality & Morbidity Conferences

|           | Preventable | Potentially<br>Preventable | Non_<br>Preventable | Non_Preventable<br>(but With Care Could<br>Have been Improved) |
|-----------|-------------|----------------------------|---------------------|--|
| Mortality |             |                            |                     |  |
| Morbidity |             |                            |                     |  |
