

## Laryngectomy Template (Macroscopic Description):

**Patient name:**

**Pathology no:**

**Clinical data:**

Fresh tissue received: *no/yes*

- 1st container:

Labeled as:

Specimen:

Specimen dimensions: - --x- --x- -- cm

Hyoid bone: *absent/present (measuring:- --x- - -x - --)*

Laterality: *right /left / cross midline*

Tumor Dimension: - --x- -- cm

Tumor Site:

- *Supraglottic: epiglottis / aryepiglottic folds / arytenoids / false vocal cords / ventricle*

- *Glottic: true vocal cord/ant commissure/post commissure*

- *Subglottic*

- *Transglottic tumor: yes/no*

Tumor description: *polypoid / exophytic / endophytic / ulcerative / fibrous thickening*

Macroscopic involvement of other tissues: *Laryngeal cartilage /extralaryngeal tissues /other*

- 2nd container

Labeled as:

Specimen:

Specimen dimensions: - --x- --x- -- cm

Macroscopic abnormality:

- 3rd container:

Labeled as:

Lymph node: *site/total number/max diameter*

- 4th container:

Labeled as:

Lymph node: *site/total number/max diameter*
