

## Radical Orchiectomy Template (Macroscopic Description):

**Patient name:**

**Pathology no:**

### Clinical data:

- 1st container:

Specimen:

Measurement of specimen: ..... x ..... x ..... (mm)

Size of testis (without tunical sac): ..... x ..... x ..... (mm)

Length of spermatic cord: ..... (mm)

Abnormalities of the spermatic cord: *No / Yes*

Abnormalities of the surface of tunica vaginalis: *No / Yes*

Tumor: *Absent / Present*

Tumor size: ..... x ..... x ..... (mm)

Multi-nodularity: *Absent / Present*

Heterogeneity: *Uniform / Varigated*

Color:

Consistency: *Firm / Solid / Cystic / Gelatinous*

Hemorrhage: *Absent / Present*

Necrosis: *Absent / Present*

Macroscopic extent of tumor: *Confined to testis / Invades epididymis / Invades scrotum / Invades hilar soft tissues / Invades tunica vaginalis / Invades spermatic cord*

Appearance of uninvolved testis: *Normal / Fibrosis / Other nodules*

- 2nd container:

Lymph nodes: *Rt/ site / total number/ max diameter*

*Nodal metastasis/mass: absent/ present; site and max size*

- 3rd container:

Lymph nodes: *Lt/ site / total number/ max diameter*

*Nodal metastasis/mass: absent/ present; site and max size*
