

Thyroidectomy, macroscopic description

Patient Name: **Pathology No:**

Clinical data:

Fresh tissue received: no/yes

1st container:

Labeled as:

Specimen:

Specimen laterality: Left/Right/Unoriented (for lobectomy)

Parathyroid glands: absent/present

Specimen dimensions:

Right lobe:--x- --x- --cm Left lobe:--x- --x- --cm Isthmus:--x--x- --cm

Weight of specimen: (gr)

Thyroid capsule: intact/not intact

Cut surface description: no lesion/Fibrotic/purulent/nodular/multinodular

Lesion/nodule/tumor(s): Number: Greatest dimension: - -- cm

Location:

Cut surface appearance of lesion: solid/cystic

Borders: encapsulated/infiltrative

Other macroscopic findings:

2nd container:

Lymph nodes: site/total number/max diameter

3rd container:

Lymph nodes: site/total number/max diameter
