

Uterus, Hysterectomy for Benign Condition (Macroscopic description)

Patient name:

Pathology no:

Clinical data:

Fresh specimen: *no/yes*

Labeled as:

Specimen(s):

Ovary: *Absent/Present: Rt/unlabeled ---x---x--- cm, unremarkable/cystic
Lt/unlabeled ---x---x--- cm, unremarkable/cystic*

Fallopian tube: *Absent/Present: Rt /unlabeled length (cm): diameter (cm): , unremarkable
Lt/unlabeled length (cm): diameter (cm): , unremarkable*

Uterus: *Intact/Opened*

Corpus length: *cm*

Diameter of fundus: *cm*

Diameter of Cervix: *cm*

Cervix length: *cm*

Vaginal cuff: *Absent/ present, length of vaginal cuff*

Endocervical canal: *normal appearance/polyp*

Greatest thickness of endomyometrium: *cm*

Endometrial surface: *smooth/irregular*

Endometrial polyp: *Absent/Present*

*Location: cavity/lower segment
Greatest dimension: cm*

Leiomyoma: *Absent/Present (Number/multiple)*

*Location: subserosal/intramural/submucosal
Greatest Dimension: cm*

Tan-white-gray/whorled/bulging/firm in cut surfaces

Central degeneration: *Absent/Present*

Hemorrhage: *Absent/Present*

Necrosis: *Absent/Present*

Fleshy appearance: *Absent/Present*

Adenomyosis: *Absent/Present*

Block summary: Anterior Cervix: , Posterior Cervix: , Anterior endomyometrium: , Posterior endomyometrium: , polyp: , myoma: , Adenomyosis: , Right ovary: , Right fallopian tube: , Left ovary: , Left fallopian tube
