

## Uterus, Hysterectomy for Cervical Carcinoma (Macroscopic description)

Patient name:

Pathology no:

### Clinical data:

Fresh specimen: *no/yes*

- 1<sup>st</sup> container:

Labeled as:

Specimen(s):

Ovary: *Absent/Present: Rt ---x---x--- mm*

*Lt ---x---x--- mm*

Fallopian tube: *Absent/Present: Rt ---x---x--- mm*

*Lt ---x---x--- mm*

Uterus: *Intact/Opened*

Uterus length: *cm*

Diameter of fundus: *cm*

Diameter of Cervix: *cm*

Cervix length: *cm*

Vaginal cuff: *Complete /Incomplete*

Greatest dimension: *cm*

Parametrium: *left: \_\_ x \_\_ x \_\_ cm / right : \_\_ x \_\_ x \_\_ cm) Macroscopic free of / involved by tumor measuring \_\_ cm.*

Macroscopically visible tumor: *Absent/Present measuring: horizontal ....mm; depth of invasion: .....mm*

Tumor location: *Ectocervix/endocervix; \_\_ o'clock*

Macroscopic invasion: *Absent/Present, vaginal cuff, uterine body, parametrium (Rt/Lt), other organ*

Endometrial abnormality: *Absent/Present*

Myometrial abnormality: *Absent/Present*

Lower uterine segment interval: *\_ \_ cm*

Closest distance of tumor to resection margin:

2nd container: Labeled as:

Lymph nodes: *Rt/site / total number/ max diameter*

3rd container: Labeled as:

Lymph nodes: *Lt/site / total number/ max diameter*
