

Colorectal resection for tumor template (Macroscopic description)

Patient name:

Pathology no:

Clinical data:

Labeled as:

Anatomical components included and size: *terminal ileum cm, small intestine cm, coloncm, appendix*
x.... cm, omentum _ _x_ _x_ _ cm

Specimen length: *..... cm and diameter in margins, cm*

Tumor perforation: *absent/present*

Tumor focality:

Tumor site:

Tumor configuration: *polypoid / ulcerated / circumferential*

Maximum tumor diameter:

Distance from closest margin: *_ mm*

Serosa appearance: *Intact / invaded by tumor / discrete nodules along the serosal surface*

Distance from dentate line in anorectal resection: *.... mm*

Polyp: *Absent /Present: Polyp arises within mucosal abnormality or normal-appearing colon/ Polyp size _ x_ mm and location _ x_ mm*

Lymph nodes: *composed of ... lymph nodes, the greatest lymph node measuring.....*
